# Aman bind

**Frontend Developer(React)**

## Professional Summary

Dynamic frontend developer expertly skilled in React.js, HTML, CSS, and JavaScript. Demonstrates exceptional problem-solving and collaboration abilities with a strong aptitude for integrating frontend components with server-side APIs. Swiftly adapts to new technologies, leveraging Generative AI to enhance development efficiency and innovation.

## Experience

**Shivila Technology** | Internship in React Developer | February 2023 – August 2023

- Designed and developed a responsive and interactive front page using React that enhanced user engagement.
- Implemented navigation, sign-up, and login functionalities to improve user experience on multiple devices.

## Projects

**Resume Builder**  Live Demo Link  Github Repo Link

React  Redux  Responsive Web Design  Firebase
Chakra UI

- Developed a web application using React.js, showcasing strong proficiency in JavaScript and React.js framework.
- Implemented real-time preview and customization features, emphasizing scalability and responsive design.
- Designed visually appealing and user-friendly resume templates, ensuring optimal performance across devices.

**Tata Cliq**  Live Demo Link  Github Repo Link

JavaScript  HTML5  CSS3  Responsive Web Design
Git  Bootstrap

- Built a fully responsive e-commerce website using JavaScript, HTML5, and CSS3, aligning with industry standards for frontend development.
- Developed responsive payment pages, integrating frontend components seamlessly with backend logic.
- Implemented features such as sorting, filtering, and product search, optimizing the web application for speed and performance.

**ThinkSpace**  Live Demo Link  Github Repo Link

JavaScript  HTML5  CSS3  Tailwind  Git

- Developed a collaborative whiteboard app with a focus on responsive design using JavaScript, HTML5, and CSS3.
- Integrated Firebase for authentication, demonstrating capability in integrating frontend components with server-side APIs.
